# JAEMIN CHO

## Unity / C# Game Developer

Computer Game Design student at George Mason University who has shipped 10+ playable games in Unity and Unreal, from solo game jam entries to club projects with up to 14 people. Programs gameplay and UI, makes pixel art, and has taught Unity and C# to other students.

## PROJECTS

**This Is Not Chess** Team of 3 · Unity, C# — Oct 2026
Online multiplayer chess fused with other genres, starting with a card game of 22 rule-bending jokers, so even non-chess players can enjoy it. Built with AI pair programming on purpose, to learn to use AI well. itch.io trailer

**Toast to the Past** Solo · Unity, Aseprite — May 2026
2D platformer where you speed up, slow or stop time (programming, pixel art, levels), made in two days for the 2026 GMU Spring GameJam. itch.io trailer

**Cat'astrophe** Team of 6 · Unity — Nov 2025
Producer and main programmer on a 2D vertical-scrolling shooter for phones, with data-driven enemy waves and object pooling; the Android build is 90% complete, aiming for Google Play. itch.io

**Shh** Solo · Unity, 3ds Max, Aseprite — Sep 2025
Horror escape game made alone (programming, art, sound, voice); 1st place overall at Mason Korea Game Jam Fall 2025. First time trying procedural animation. itch.io trailer

**Save the Pig** Team of 7 · Unity — 2023 - 2024
Co-programmed a farming sim about African Swine Fever; shown at the World Food Forum in Rome and released for HTML5 and Android. itch.io trailer

**Lost** Solo · Unreal Engine — Dec 2023
3D horror maze escape in Unreal Engine Blueprints, with monster AI that hunts by sound; shipped a Windows build. itch.io trailer

**Sweet Sixteen** Team of 14 · Unity — May 2023
Programmed the enemies and co-built the UI for a club game about drug addiction; Progress@Play Award. itch.io

In progress

## EXPERIENCE

**Learning Assistant**, Unity & C# · George Mason University — Mar - Jun 2026
Supported GAME 140 and 240 for 180+ hours with live debugging, office hours and code reviews on camera, physics/collision and health systems; every build error brought to me was fixed.

**Programmer** · FAO Korea & SDGs Builders collaboration — Oct 2023
Built Save the Pig with Gnonymous for FAO; the game was exhibited at World Food Forum 2023 at FAO headquarters in Rome, where the booth drew 100+ visitors.
GMU article FAO event page

**Lecturer**, MK Mentoring · Game design program — Sep 2023
Taught 9 hours over 3 sessions; the students rebuilt the game Pong in Unity.

**Vice President** · Gnonymous game club — Feb - Dec 2023
Led club projects and members after serving as PR Manager (from Aug 2022).

## SKILLS

**Programming**
C# (advanced)
C++ (familiar)

**Engines**
Unity (advanced)
Unreal Engine (basic)
Effect House

**Art & Video**
Aseprite, Photoshop
3ds Max (basic)
DaVinci Resolve

**Other**
Git/GitHub, teaching, team collaboration

## EDUCATION

**George Mason University**
BFA, Computer Game Design
Feb 2022 - Expected 2027
Dean's List (3 semesters)

## SERVICE

**Military Service**
Republic of Korea Army
2023 - 2025

## LANGUAGES

Korean (native)
English (upper intermediate)

## AWARDS

1st place overall, Mason Korea Game Jam Fall 2025
Progress@Play Award, 2023
